

EZ POUR 50 MELTERS

**ENGINEERED
SAFETY**

CRAFCO[®] INC
PRESERVATION PRODUCTS PAVEMENT
Delivering Confidence Through Innovation, Quality and Value Since 1976

PERFORMANCE

Engineered for performance the EZ Pour 50 is built to meet or exceed our customers' expectations. This gravity fed 50 gallon melter, includes bi-directional agitation, durable steel construction, fast melting recovery rate and reliable engine. Crafcó's commitment to excellence guarantees that the EZ Pour 50 will perform as expected for our customers.

EASY

The EZ Pour 50 melter features hydraulic powered full sweep agitation and a one-hour heat-up time, which get crews into production quicker.

RELIABILITY & CONSISTENCY

The internal design of the EZ Pour 50 melter handles field mix or pre-packaged material and heats up and applies all hot-applied sealant.

LOW MAINTENANCE

The precision engineering and construction of the EZ Pour 50 makes for a quality trouble-free, safe to operate melter with the lowest operating cost in the industry.

EZ POUR 50

There are many safety features such as the splash-proof lid and curb side material loading keeping the operator safely away from traffic. The low profile of the melter makes loading sealant both easy and efficient. The Crafcó EZ Pour is a flush-free clean-up system, which requires no solvents and is designed for the small operator and project.

OIL JACKETED DOUBLE BOILER TANK

Quickly, efficiently and safely heats the material to appropriate operating temperature without risks of damaging sealant material

CERAMIC INSULATION

More durable Insulation; high heat retention

BI-DIRECTIONAL AGITATION

For faster melter recovery rate

FLUSH FREE

No clean-out required

ERGONOMIC FEATURES

Splash proof loading lid limits operator's exposure to fumes as well as minimizes back strain when loading sealant materials

HITCH EXTENSION

Multiple hitch options ranging from 2"-3" (5.08cm-7.62cm)
