

## ACO CHEM INJECTION PLATFORM

| Name                           | Target Segment                  | Chemistry     | Type        | Main Purpose                     | System              | Aspect                    | Pump                                       |
|--------------------------------|---------------------------------|---------------|-------------|----------------------------------|---------------------|---------------------------|--|
| <b>PURINJECT 1C 115 ECO</b>    | All                             | Polyurethane  | Hydrophobic | Leaksealing                      | One component + cat | Semi rigid foam           | One component                              |
| <b>PURINJECT 1C 55 LV</b>      | All                             | Polyurethane  | Hydrophobic | Leaksealing                      | One component + cat | Semi rigid foam           | One component                              |
| <b>PURINJECT 1C FLEX</b>       | All                             | Polyurethane  | Hydrophobic | Leaksealing                      | One component + cat | Full flexible foam        | One component                              |
| <b>PURINJECT 1C HYDROFOAM</b>  | All                             | Polyurethane  | Hydrophilic | Leaksealing                      | One component       | Strong, resilient foam    | One component / (two component with water) |
| <b>PURINJECT 1C SOIL</b>       | Professional soil stabilisation | Polyurethane  | Hydrophobic | Soil stabilisation               | One component + cat | Ultra low viscosity resin | One component                              |
| <b>PURINJECT 2C ELASTIC LV</b> | All                             | Polyurethane  | Hydrophobic | Leaksealing                      | Two component       | Flexible elastomer resin  | One component                              |
| <b>PURINJECT 2CW</b>           | Tunnelling / Infra              | Polyurethane  | Hydrophobic | Leaksealing                      | Two component       | Rigid foam                | Two component with static mixer            |
| <b>PURINJECT 2CD</b>           | Tunnelling / Infra              | Polyurethane  | Hydrophobic | Leaksealing / soil stabilisation | Two component       | Rigid foam                | Two component with static mixer            |
| <b>SILINJECT 2C FOAM</b>       | Tunnelling / Infra              | Urea-silicate | Hydrophobic | Leaksealing / soil stabilisation | Two component       | Rigid foam                | Two component with static mixer            |
| <b>SILINJECT 2C FLEX</b>       | Tunnelling / Infra              | Urea-silicate | Hydrophobic | Soil stabilisation               | Two component       | Elasticized / non foaming | Two component with static mixer            |
| <b>SILINJECT 2C THIX</b>       | Tunnelling / Infra              | Urea-silicate | Hydrophobic | Anchor bolting                   | Two component       | Elasticized / non foaming | Two component with static mixer            |
| <b>ACRYLINJECT R</b>           | Tunnelling / Infra              | Methacrylate  | Hydrophilic | Leaksealing / soil stabilisation | Three component     | Gel                       | Two component acrylic pump                 |
| <b>ACRYLINJECT ELASTIC</b>     | Tunnelling / Infra              | Methacrylate  | Hydrophilic | Leaksealing                      | Three component     | Soft, tacky gel           | Two component acrylic pump                 |
| <b>ACRYLINJECT OG</b>          | Professional soil stabilisation | Methacrylate  | Hydrophilic | Capping / soil stabilisation     | Three component     | Harder gel                | Two component acrylic pump                 |
